F1 RACING ANALYTICS

FUNCTIONAL AND NON-FUNCTIONAL REQUIREMENTS

Project	F1 Racing Analytics — Race Data, Visualized
Source basis	Supplied f1_racing_analytics.html and its embedded Tableau references
Document status	Completed project-specific documentation based on available source evidence

Document basis and evidence boundary

This document is populated from the supplied F1 Racing Analytics index.html. It uses the project's own wording and published KPI values. Where the HTML does not expose underlying data, formulas, workbook details or test results, that limitation is stated explicitly instead of inventing project facts.

Functional requirements

FR-01: Display the F1 Racing Analytics project identity and purpose. FR-02: Show four headline metrics: 10 teams, 17 seasons, 6,464 race outcomes and 29 circuits. FR-03: Embed the Tableau dashboard. FR-04: Provide access to nine views described as reliability, driver/team performance, championship analysis, tyre compounds, country participation and podium analysis. FR-05: Embed the Driver Points Leaderboard story. FR-06: Allow the Tableau story's Top N parameter to adjust the number of displayed drivers. FR-07: Provide navigation links to Home, Overview, Dashboard and Story. FR-08: Explain the project and the role of the dashboard and story.

Non-functional requirements

Responsive layout: CSS breakpoints adapt navigation, KPI grid, story layout and section spacing. Readability: high-contrast dark theme with red accent and clear labels. Usability: sticky navigation and clear calls to action. Embedding: Tableau Public views load through Tableau's JavaScript embed API. Maintainability: visualization IDs and sizing configuration are held in a small JavaScript array. Performance: the page gives users a note to allow Tableau time to load; actual timings are not reported.

Interface requirements

The visual design uses a dark background, charcoal panels, white text, muted supporting text and Formula 1 red (#e10600). Typography uses DM Sans and Space Grotesk. Bootstrap layout utilities and Bootstrap Icons are referenced.

Acceptance criteria

The website title is 'F1 Racing Analytics | Race Data, Visualized'. The overview shows all four stated KPIs. The dashboard embed references Tableau shared view 9Z3NGD45Z. The story embed references shared view JJ57Z8NDB. The Top N behavior is described in the story section. Navigation anchors point to the intended sections.

Constraints

The page depends on external assets and Tableau Public availability. The supplied HTML references local Bootstrap asset paths, Google Fonts, Bootstrap Icons and Tableau's embed script. The actual availability of those files in deployment is not verifiable from the HTML alone.
