F1 RACING ANALYTICS

DATA COVERAGE AND KPI DEFINITIONS

Project	F1 Racing Analytics — Race Data, Visualized
Source basis	Supplied f1_racing_analytics.html and its embedded Tableau references
Document status	Completed project-specific documentation based on available source evidence

Document basis and evidence boundary

This document is populated from the supplied F1 Racing Analytics index.html. It uses the project's own wording and published KPI values. Where the HTML does not expose underlying data, formulas, workbook details or test results, that limitation is stated explicitly instead of inventing project facts.

Coverage summary

The website displays four headline figures: 10 competing teams, 17 seasons in play, 6,464 race outcomes logged and 29 circuits showcased. These are the project's published headline values.

Interpretation of teams

The KPI label is 'Competing teams'. The HTML does not specify whether this means all constructors in the full historical dataset, teams in a selected period, or a particular season. Preserve the website's label and avoid adding a broader interpretation.

Interpretation of seasons

The KPI label is 'Seasons in play' and the value is 17. The exact first and last season years are not stated in the supplied HTML.

Interpretation of race outcomes

The KPI label is 'Race outcomes logged' and the value is 6,464. The HTML does not define whether the count is driver-race rows, classified results, or another record grain.

Interpretation of circuits

The KPI label is 'Circuits showcased' and the value is 29. The HTML does not provide the circuit list or explain whether alternate layouts of the same venue are counted separately.

Data dimensions named by the site

Drivers, teams, race outcomes, tyre strategies/compounds, circuits, countries and podium finishes. The dashboard description additionally names reliability and championship analysis.

Data quality status

No row-level validation results, missing-value counts, duplicate counts, date coverage or source citations are included in the supplied HTML. These cannot be reported as verified facts from this source.
