F1 RACING ANALYTICS

WEBSITE IMPLEMENTATION AND TECHNOLOGY STACK

Project	F1 Racing Analytics — Race Data, Visualized
Source basis	Supplied f1_racing_analytics.html and its embedded Tableau references
Document status	Completed project-specific documentation based on available source evidence

Document basis and evidence boundary

This document is populated from the supplied F1 Racing Analytics index.html. It uses the project's own wording and published KPI values. Where the HTML does not expose underlying data, formulas, workbook details or test results, that limitation is stated explicitly instead of inventing project facts.

Implementation overview

The supplied file is a standalone HTML document titled F1 Racing Analytics | Race Data, Visualized. It contains the page structure, embedded CSS and JavaScript used to present the Tableau outputs.

HTML

HTML5 provides semantic page sections: header, navigation, main, sections and footer. The viewport meta tag supports responsive rendering. The page title and description identify the project.

CSS

CSS custom properties define colors and visual tokens. The stylesheet implements the hero, KPI cards, visualization frames, story cards, sticky navigation, typography, hover states and responsive breakpoints.

Bootstrap

The page references assets/vendor/bootstrap/css/bootstrap.min.css and assets/vendor/bootstrap/js/bootstrap.bundle.min.js. Bootstrap grid and utility classes are used for responsive layout and spacing.

Bootstrap Icons

The page references assets/vendor/bootstrap-icons/bootstrap-icons.css and uses icon classes for people, calendar, flag, globe, chart, sliders, lightbulb, arrow and navigation cues.

Typography

Google Fonts supplies DM Sans and Space Grotesk. The page uses Space Grotesk for headings and brand text, and DM Sans for body copy.

JavaScript

Inline JavaScript writes the current year into the footer and initializes two Tableau embeds. It detects mobile viewport width, sets visualization heights and loads Tableau's viz_v1.js asynchronously.

Tableau

Tableau Public hosts the dashboard and story. The page embeds shared views 9Z3NGD45Z and JJ57Z8NDB.

Technology not evidenced

No Python, Flask, SQL database, MongoDB, Power BI, machine learning framework or custom backend appears in the supplied F1 HTML. Do not list these as technologies used in this project based on this file.
