# F1 RACING ANALYTICS

DEFECT LOG AND RELEASE CHECKLIST

| | |
|---|---|
| **Project** | F1 Racing Analytics — Race Data, Visualized |
| **Source basis** | Supplied f1_racing_analytics.html and its embedded Tableau references |
| **Document status** | Completed project-specific documentation based on available source evidence |

## Document basis and evidence boundary

This document is populated from the supplied F1 Racing Analytics index.html. It uses the project's own wording and published KPI values. Where the HTML does not expose underlying data, formulas, workbook details or test results, that limitation is stated explicitly instead of inventing project facts.

## Release checklist — content

Confirm KPI values against the source workbook; ensure the 17-season period is accurately described; verify the 6,464 count definition; verify the 29-circuit count; ensure dashboard topic descriptions match all nine workbook sheets.

## Release checklist — Tableau

Open dashboard shared view 9Z3NGD45Z; open story shared view JJ57Z8NDB; test the toolbar; verify all dashboard sheets; test Top N; confirm published views are publicly accessible.

## Release checklist — website

Verify local Bootstrap CSS and JS paths; verify Bootstrap Icons; verify Google Fonts fallback; check responsive breakpoints; test all anchor links; confirm footer year updates automatically.

## Release checklist — accessibility

Use meaningful link text; verify text contrast; ensure icons are not the only way information is conveyed; test keyboard focus and zoom.

## Defect log format

Defect ID; date; browser/device; affected component; steps to reproduce; expected result; actual result; severity; resolution; retest status.

## Known verification boundary

The supplied HTML contains no completed test log, defect history, release version or production monitoring evidence. This document provides a project-specific release checklist rather than claiming tests have passed.
